GABION CONTRACTOR: Retaining Solutions Ltd

DESIGN, MANUFACTURE & SUPPLY: HY-TEN Gabion Solutions

GABION CLADDING & WALLING

Max. Height : 3.0m	Total Length : 183m	Total Area : 569m ²
--------------------	---------------------	--------------------------------

Situated on the site of an old Vauxhall Plant factory, Napier Park in Luton is a residential housing project which posed a variety of engineering & construction problems from the outset.

Built as three, distinct tiers, Napier Park required a considerable amount of sheet piling to create the roads and footpaths which wound their way through the remediated land and connected the different parts of the site, which meant there was also a great deal of steelwork left exposed.

By utilising Hy-Ten gabion baskets to clad the sheet piling, as well as constructing the walls needed to install staircases along the snaking footpath, the gabion installers were able to turn these unattractive steel piles into a feature of the development.

If you would like Hy-Ten to design and supply gabions & land reinforcement products for you, please contact us on 01902 712200 or email sales@hy-tengabions.com
